

## About Me

I am an enthusiastic, self motivated and dedicated individual, with a solid background in both Design & Development. I am currently employed as a Front-end Developer at Quba Digital, responsible for creating Front end code for a range of projects.

Studying Digital Media Production at university allowed me to experiment with a number of different mediums and really focus on my overall knowledge of the industry. I quickly realised however that I had a passion for the web.

I am currently looking for an opportunity to join a dynamic and fast paced environment to further my skills as a Front End Developer and further my career within the industry.

2009 - 2011

## Work Experience

Quba Digital

Front-end Developer

April 2017 - Present

I am currently working as a Front-end Developer at Quba, a Sheffield based agency. I have been responsible for implementing best practises across the front end stack on new and existing projects. This has allowed me to focus and improve my personal skills but also develop the understanding within the company.

Throughout my time at Quba I have been involved in a number of projects. Also being given the opportunity to run a number of workshops internally and with clients.

Reading Room London

UX Developer

August 2015 - April 2017

Working within this large, fast paced agency really allowed me to progress my knowledge of Front End Development. While working here I have been part of a number of projects ranging from international corporations to the NHS.

I was responsible for producing full prototypes using HTML, CSS/ Sass and jQuery/ Javascript to demonstrate a full working example of the site. Working closely with the designers and back-end developers to maintain best practise throughout the whole process.

While working here my knowledge increased greatly and really pushed me to the next level of my career.

Active Internet Marketing (UK)

Web Designer & Developer

June 2014 - August 2015

At Active Internet Marketing my duties included Designing, Developing and Maintaining clients sites. Utilising open source CMS platforms such as Wordpress, Woo Commerce & Magento, we were able to create simple blogs, to full E-commerce stores.

I was responsible for developing W3C compliant websites, using the latest techniques. This included creating flat designs to fit the clients needs, utilising front end languages to bring the designs to life and open source CMS technologies to give the client full control over the site. My role also covered maintenance and improvement of existing clients sites.

Freelance Designer / Developer

Freelance Work

September 2011 - Present

Working with a number of small local businesses, providing design and development. Having these opportunities has allowed me to develop my understanding of project and time management.
